

✓ Congratulations! You passed!

[Go to next item](#)

Grade received **100%** To pass 80% or higher

1. In git, the default branch of a repo is called the _____.

1 / 1 point

- ☐ Primary Branch
- ☐ Secondary Branch
- ☐ Super Branch
- ☒ Main Branch

✓ **Correct**

Correct! The default branch is known as the main branch, or, master branch on older repositories.

2. What is the request to merge forked changes called?

1 / 1 point

- ☐ Push Request
- ☒ Pull Request
- ☐ Code Request

✓ **Correct**

Correct! You open a pull request to request merging of your forked changes.

3. When you clone a forked repository, what does origin refer to?

1 / 1 point

- ☐ Another developer's repository
- ☐ The original repository
- ☒ The forked repository

✓ **Correct**

Correct! The origin will always default to the clone URL. In this case, the forked repository is the origin.
