1. Is this code a correct way to import an image in React?

1 / 1 point

```
1 import avatar from "../assets/avatar.png"
2
3 function UserImage() {
4   return (
5     <div>
6       <img
7         src={avatar}
8         alt = "User image"
9       />
10    < /div>
11  )
12 }
13 export default UserImage;
```

☒ Yes.

☐ No.

✓ Correct

That's right, this code is the correct way to import an image in React.

2. Is this code a correct way to import an image in React?

1 / 1 point

```
1 function UserImage() {
2   const avatarImg = "https://picsum.photos/400/265";
3   return (
4     <div>
5       
9     </div>
10  )
11 }
12 export default UserImage;
```

☐ Yes

☒ No

✓ Correct

Correct. This code is not valid. The src attribute needs to be as follows: src={avatarImg}

3. What's wrong with this code?

1 / 1 point

```
1 function ProfileImage() {
2   const profileImg = "https://picsum.photos/400/265";
3   return <img src={profileImg} alt="Profile image" />
4 }
5 export default ProfileImage;
```

- ☐ There should be parentheses after the return keyword and the `img` element should spread its attributes over multiple lines.
- ☒ Nothing. This code is correct.
- ☐ You must surround the `img` element with a root, wrapping `div` element.

**Correct**

Correct. There's nothing wrong with the code in the question.
