Grade received **100%** To pass 80% or higher

1. _____ are constantly changing collections of reusable components, principles and guidelines.

1 / 1 point

- ☒ Design systems
- ☐ Components
- ☐ Brand style guide

✓ **Correct**

Correct! Design systems are constantly changing collections of reusable components, principles and guidelines.

2. Does a design system consist of objectives and shared values?

1 / 1 point

- ☒ Yes
- ☐ No

✓ **Correct**

Correct! Aligning design teams around a standard set of goals is critical. It will help create a vision and may ensure everyone looks in the same direction. These objectives will change over time, which is natural. So, changes need to be widely communicated.

3. Material design is the visible elements of a brand, such as color, design and logo, that identify and distinguish the brand in the minds of consumers. It's referred to as brand identity.

1 / 1 point

- ☒ False
- ☐ True

✓ **Correct**

Correct! Brand identity and language are the visible elements of a brand, such as color, design and logo, that identify and distinguish the brand in consumers' minds.

4. _____ are the building instructions that allow you to use components logically and consistently across all products.

1 / 1 point

- ☐ Components
- ☒ Patterns
- ☐ Design systems

✓ **Correct**

Correct! Patterns are the building instructions that allow you to use components logically and consistently across all products.

5. Design principles lay a better foundation and guide a team through the creation and ongoing implementation of a design system.

1 / 1 point

- ☐ False
- ☒ True

✓ **Correct**

Correct! Design principles lay a better foundation and guide a team through the creation and ongoing implementation of a design system.
