 ○ False ○ Correct Correct! The reducer function takes in the initial state and an action and returns the new state. 	
 True or false: The useState hook is best suited for complex state logic or when the next state depends on the previous one. True 	1/1 point
 False ✓ Correct Correct! Actually, the useReducer hook is better suited for those use-cases 	
 3. A common scenario for using the useRef hook is to focus the cursor into an input field. control a component's state. handle side effects. memorize expensive operations. 	1/1 point
Correct Correct. That's a "textbook example" of the useRef hook in use.	
 4. True or false: Building your own Hooks lets you extract component logic into reusable functions True False Correct 	1/1 point
