Go to next item

1. True or False: You code a custom hook when you want to avoid duplication.

   1 / 1 point

   ◉ True

   ○ False

   ✓ **Correct**
   Yes, it is correct that you code a custom hook when you want to avoid duplication.

2. Let's imagine you code a custom hook, called for example useNext, on a separate file named useNext.js.

   1 / 1 point

   What's the minimum requirement for the custom useNext hook to be a valid hook?

   ○ The custom hook should always return a value

   ◉ The custom hook should use at least one built-in React hook

   ○ The custom hook should always receive a parameter

   ✓ **Correct**
   Correct, that's the minimum requirement for the custom hook to be valid

3. In the previous exercise, you were given a task to create your own custom hook, `usePrevious`. What was being returned from the `usePrevious` function declaration?

   1 / 1 point

   ◉ `ref.current`

   ○ `ref`

   ○ `current`

   ✓ **Correct**
   Correct. The value that needed to be returned from the `usePrevious` hook was the current property on the `ref` object.
